

International Center for Regulatory Science Board and Research Group Member Dr. Gerald Loeb's team and product recognized as World Economic Forum 2014 Technology Pioneer

SynTouch LLC, developer and maker of the only sensor technology in the world that endows robots with the ability to replicate - and sometimes exceed - the human sense of touch, was today named a World Economic Forum Technology Pioneer 2014. <http://www.weforum.org/>

SynTouch's Chief Executive Officer and Founding Partner is Dr. Gerald Loeb, who is also a Board and Research Member and a Lecturer for the International Center for Regulatory Science at USC.

You can read more at the World Economic Forum blog:
<http://forumblog.org/2013/08/introducing-the-2014-technology-pioneers/>

The company's own press release can be sent to anyone who might be interested:
<http://www.syntouchllc.com/Media/News/2013-08-27-SynTouch-Named-Technology-Pioneer/>

The company's website is under revision, but lots of general information is on the old site:
<http://www.SynTouchLLC.com>

Dr. Loeb said, "Congratulations to everyone who has contributed to what we have accomplished so far and thanks to those who are working so hard to get to where we know this technology can go."
